

ABSTRACT OF DISCLOSURE

An egg yolk separator comprises a strainer having a portion for retaining an egg yolk and apertures for  
5 straining egg white therefrom. A pair of arms extends in opposite directions from the strainer for resting on opposite sides of a top opening of a vessel to locate the overall separator thereon. One of the arms is extendable and retractable in length such that the length of the  
10 overall separator is adjustable to suit the width of the vessel opening.
